

a Paleomagnetic sites

- Flow, normal polarity
- Flow, reversed polarity
- Clast / conglomerate site
- Ar/Ar age ±2σ (Table 1)

c Cover and breccia

- Sandy silt
- Pebble lag
- Tektites
- Vein quartz
- Sandstone clasts
- Weathered basalt clasts, rinds
- Unweathered basalt
- Impact level (~790 ka; a, b)

c Pre-impact substrate

- Weathered basalt flow
- Fluvial gravels
- Mesozoic sandstone
- Mesozoic mudstone

Panel c redrawn and modified after Sieh et al. (2023)
